Re: WNDD (FM), Silver Springs, FL  
Ocala Broadcasting Corporation, LLC  
Facility Identification Number: 1099  
Special Temporary Authority  
BSTA-20160301AEF<sup>1</sup>

Dear Licensee:

This is in reference to the request filed March 1, 2016 on behalf of Ocala Broadcasting Corporation, LLC ("OBC"). OBC explains that WNDD was operating at reduced power due to transmitter issues. OBC requests Special Temporary Authority (STA) for continued operations at reduced power until repairs can be completed.

Section 73.1560(d), which governs reduced power operation, states:

In the event it becomes technically impossible to operate at authorized power, a broadcast station may operate at reduced power for a period of not more than 30 days without specific authority from the FCC. If operation at reduced power will exceed 10 consecutive days, notification must be made to the FCC in Washington, DC, Attention: Audio Division (radio) or Video Division (television), Media Bureau, not later than the 10th day of the lower power operation. In the event that normal power is restored within the 30 day period, the licensee must notify the FCC of the date that normal operation was restored. If causes beyond the control of the licensee prevent restoration of the authorized power within 30 days, a request for Special Temporary Authority (see Section 73.1635) must be made to the FCC in Washington, DC for additional time as may be necessary.

Because OBC filed the reduced power STA request as a Legal STA request instead of an Engineering STA request, it was not recognized until now that this request actually involved engineering matters. This has resulted in the delay in considering this request. It is not immediately clear whether licensed operation has resumed, or whether the STA is still needed. We therefore GRANT the reduced power STA request for a period of three months, in the event the station still requires it.

Station WNDD may continue to operate with reduced power, as needed. OBC must notify the Commission when licensed operation is restored (if it has not done so already). OBC must use whatever means are necessary to protect workers and the public from radiofrequency exposure in excess of the Commission's exposure guidelines. See 47 CFR § 1.1310.

---
